"KUDU" NEWS

For FARM and GARDEN

CURRENT PRICE LIST No. 501—Issued 7th Feb., 1941

COMPOSTS

AT "BELLE CONSTANTIA"

The growing scarcity of stable manure and the great variation in quality of what is obtainable have forced gardeners and farmers to look to other means of keeping up the humus content of their soils. Composting of organic waste material and green-manuring are the obvious alternatives. There is considerable variation of technique in the preparation of the former and much controversy as to the efficacy of the latter. Certainly in semi-arid regions and in seasons of low rainfall here in the Western Province the practice of green-manuring has not given uniformly good results; in fact in some instances the cost has been out of all proportion to the benefit gained. Gardeners and farmers are, therefore, going in more extensively for composting.

(Continued on page 5)

KLIMATISERING van BOLLE

Terwyl Swaardlelie (*Gladiolus*) en baie ander bolle bevredigend sal groei die eerste seisoen na die invoer daarvan, is daar party soorte, veral die Affodille, Naeltjieblomme en Tulpe wat een of twee seisoene nodig het om te klimatiseer. Goeie voorrade van hierdie geklimatiseerde bolle is glad nie volop nie, maar STARKE-AYRES het daarin geslaag om hulle beste te lewer deur elke afsonderlike soort bol te laat groei in die omgewing waar dit hom die beste pas. Dus groei ons Affodille, Naeltjieblomme, Tulpe ens. in sanderige grond, terwyl Swaardlelies, Flapen en ander gegroei word op ons welbekende blom-plaas, „Belle Constantia,” waar die grond van ’n swaarder samestelling is.

SUB. CLOVER

MIXED EARLY and MID-SEASON SEED

In the Winter Rainfall Area this pasture plant is making headway, particularly in the coastal districts from Caledon towards Knysna. The seed should be sown just prior to, or with, the first winter rains. Apply a good dressing of basic superphosphate at the same time.

The Dwalganup Early strain is most likely to mature its seed-crop before the hot summer weather dries up the plant. Thus the clover, which is an annual, will again appear year after year through re-seeding itself. In the dry state the plants and seed pods are also eaten by sheep and are very fattening. Sufficient seed will be left in the soil for a good stand the following winter.

(Continued on page 26)

SHRUBS and PLANTS

In the July, 1940, issue of KUDU NEWS we published a descriptive list of Flowering Trees and Shrubs, Herbaceous and Perennial Plants, Palms, Conservatory Plants and Ferns, Hedge and Climbing Plants. Copies of these booklets are still available and will gladly be posted on application.

In this present issue we are publishing an **Advance List of Roses for 1941**. Should circumstances permit it is our intention to publish our usual **Special Rose Number** in April which will contain fuller descriptions of each variety. Copies of the 1940 **Special Rose Number** are still available.

Publication of a Hardware Price List is almost impossible in these times. We solicit your enquiries for prices of Garden Hardware and Florists' Sundries—especially Qualcast Lawn Mowers, for which we also carry spare parts.

Seeds, Bulbs, Roses, Carnations

TERMS OF BUSINESS

NON-WARRANTY

We give no guarantee expressed or implied (and none of our representatives is authorised to vary this condition in any way) as to description, quality or productiveness or as to any other matter of any seeds, bulbs or plants we sell, and we are not in any way responsible for them or in respect of the crop or failure of the crop. All quotations are given and orders accepted only on the understanding that these conditions are agreed to.

KOOPVOORWAARDES

Ons gee geen direkte of indirekte waarborg (en geen van ons verteenwoordigers is gemagtig om hierdie voorwaarde te verander nie) met betrekking tot beskrywing, kwaliteit, produktiwiteit of enige ander saak omtrent die saad, bolle of plante wat ons verkoop nie, en ons is op generlei wyse aanspreeklik vir hulle of vir die oes of mislukking van die oes nie. Alle prysopgawes word verstrekte bestellings uitgevoer mits daar met hierdie voorwaardes ingestem word.

C. STARKE & CO. LIMITED.

PRICES

We quote free on rail without engagement, subject to crop failure and being unsold on receipt of order. All previous issues of this Price List are hereby cancelled. Generally we are able to adhere throughout the season to the prices quoted in our Annual General Catalogue; where necessary however they may be varied by alterations published in this Price List.

FORWARDING

Unless instructed to the contrary we will send goods the cheapest way. Postage must be included when cash is sent and where goods are to be consigned to a siding railage must be added. In the event of insufficient money being sent with order we reserve the right to reduce the goods sent accordingly. Only South African grown seeds may be sent by Agricultural Post. By passenger train seeds travel at half Parcels Rate.

SUBSTITUTIONS

When varieties ordered are not available we use our discretion and send suitable substitutes if possible. These are sent for your approval but should they not meet with your requirements they should be returned immediately.

PACKING OF SEEDS

We use the best materials but do not charge for packing unless special packing is asked for.

PACKING OF PLANTS

We charge this up at cost price. Our packing is adequate protection for the rail or post journey as the case may be, but we cannot be held responsible for damage in transit or through delays on the journey.

DIRECTORS:

C. STARKE, Chairman.

WHERE TO ORDER

Orders may be sent either to Head Office at Mowbray or to our Pretoria Branch. When an account has once been opened at one of our establishments it is advisable always to order from that branch. Where prices are quoted as "Pretoria Prices" or "Mowbray Prices" customers should remember to allow 1/6 per 100lbs. extra for railage on seeds between branches if they place their order with the other Branch. This does not apply to seeds quoted at more than 30/- per 100lbs., which we will supply from either Branch without additional charge.

POSTAL RATES

PARCELS:

Ordinary Parcels for places within the Union, South-West Africa and Colony of Mocambique:

Not exceeding 4oz. 2d.

Not exceeding 8oz. 4d.

Not exceeding 1lb. 6d.

For every additional 1lb. or portion thereof ... 6d.

Bechuanaland Protectorate 6d. per lb.

(Kasane 1/- per lb., Ghanzi 9d. per lb.)

Southern Rhodesia 9d. per lb.

Northern Rhodesia 1/- per lb.

United Kingdom 9d. per lb.

British Commonwealth, Protectorates, Possessions and Foreign Countries: See Post Office Guide.

Agricultural Parcels addressed to any place within the Union (South African Products only):

Not exceeding 1½lb. 3d.

Not exceeding 3lb. 6d.

Not exceeding 6lb. 8d.

Not exceeding 9lb. 10d.

Not exceeding 11lb. 1/-

Not exceeding 3lb. 1/-

Not exceeding 7lb. 1/6

Not exceeding 11lb. 2/-

POSTAL "CASH ON DELIVERY" FEES.

For trade charges up to and including £1 1/-

For every additional £1 or part thereof 3d.

RAIL RATES

Seeds declared to be for sowing purposes may be sent per passenger train at half the Parcels Rate. Although most South African grown cereals are carried by goods train at very cheap rates, it is as well to warn clients that imported seeds of many kinds are not always admitted under Rate 7, which is the rate for "Seeds for Farm Sowing."

A list of seeds is published in the Railway Tariff Book and only seeds which fall under one of those heads are accepted at Rate 7. All other seeds are carried at Rate 1 unless especially provided for under another rate.

FARM SEEDS

For nearly 40 years Starke's have had a name for reliability and fair dealing and on this essential foundation we have built up a Union-wide trade in Agricultural Seeds of high quality.

Our Seed-cleaning Plant is the largest in South Africa; and many and varied are the types of machines used to obtain those first-grade samples for which we are so well known.

To make farming pay it is more than ever necessary to use the best seed and so obtain the highest yields.

Good Seed is not expensive—less need be sown per acre.

WINTER CEREALS (All prices are subject to revision after the 1941 harvest.)

COMPOSTS—(continued)

The making of composts is a very old agricultural practice: the Chinese have been doing it for thousands of years. In Europe the idea is well-known and the better grade or more complete composts have usually been made and used by market gardeners and nurserymen, while the cruder or incomplete forms of composts made from farm straw and roughage in the dung yard have been used on the larger farms. Latterly this pre-soil preparation of humus for the benefit of plants has received much study at the hands of soil chemists, agronomists and practical farmers. Even our agricultural press in South Africa has for some years now been publishing

extremely interesting articles on the subject, some written by theorists, some by scientific men. Also a great deal of useful data gained from experience under our peculiar conditions has been communicated to the press by observant but intensely practical farmers.

The older form of composting consisted essentially in building a mound in which the materials were placed in alternate horizontal layers. The materials mainly used were old leaves, straw, leaf mould from forests, crop wastes, sea-weed, stable manure, loam, lime, soot, ashes, etc. After turning the mass over at intervals of several weeks or months a fairly uniform

Sunflower, White, Sometimes available	—	—	—	—	—

NITRAGIN is prepared for the following groups of seed. (In ordering always state kind of seed to be inoculated).

Some growers report excellent results from using milk to moisten seed before applying the inoculant.

Group A

Alfalfa
Hubam
Burr Clover
Sweet Clover

Group B

Red Clover
Mammoth Clover
White Clover
Alsike
Crimson Clover
Subterranean Clover

SOIL INOCULATORS FOR LEGUMINOUS CROPS

Group C

Garden Pea
Field Pea
Sweet Pea
Vetch
Horse Bean

Group D

Navy Bean
String Bean
Wax Bean
Kidney Bean
Garden Bean

Group E

Cowpea
Lima Bean
Japan Clover
Peanut
Velvet Bean

Group S

Soy Bean
and
Other Legumes

Price per tin 5/-, postage 6d. extra.
Pretoria Price 5/- per tin, postage 6d. extra.

Each tin contains sufficient to inoculate at least one bushel of seed.

SEED POTATOES

(B)

Owing to war conditions we did not this past season import Scotch grown seed tubers as usual. Following up our successful importation from Canada in 1939 we again landed a shipment from that Dominion in December 1940, consisting of Green Mountain and Kathadin. During the coming winter "first-from-imported" seed grown from this importation should be available.

Meantime we offer, as and when available, South African grown seed-tubers of the following varieties. **Prices on application.**

We pack in cases of 66lbs. net weight or in bags of 150lbs. and are prepared to quote for delivery f.o.r. Rosebank, subject to being unsold on receipt of order.

Annan Banner, main-crop, white skin, very few small tubers, good yielder.

Arran Chief, main-crop, white skin, does well along South-West coastal districts.

Flourball, early main-crop, roundish, pink skin, white flesh, reliable variety.

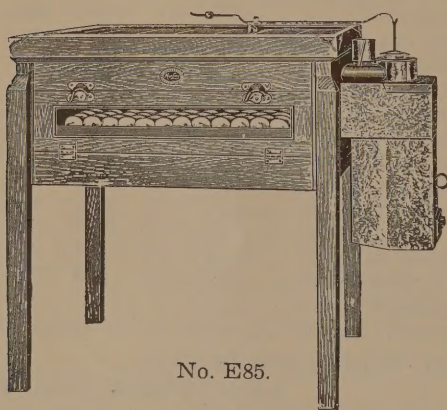

Green Mountain, very much like Ragis Zehn, flesh white and mealy; a Canadian variety that does well in Western Province.

King George V, splendid variety for Western Province, prolific, white skinned oval potato.

President, a Canadian variety similar to Up-to-Date in colour, shape, texture and maturity.

Ragis Zehn, main-crop, rough white skin, does well in the Boland.

Up-to-Date, main-crop, oval, white skin, a favourite variety in summer rainfall areas.

No. E85.

<i>Nemesia strumosa</i> , large-flowered strain	6d.	—	2/6	8/6
<i>Nemesia polychroma</i> , perennial, mauve	1/-	3/6	12/6	—
<i>Sutera grandiflora</i> , lavender phlox-like flowers	1/-	8/-	30/-	—
<i>Venidium fastuosum</i> , golden yellow, maroon zone	6d.	—	4/-	15/-

SUB. CLOVER—(continued from page one)

The Mid-Season or Mount Barker strain produces a more leafy growth and makes better herbage but it is later maturing. In seasons when the rains pinch off early in the spring this means that the seed pods cannot ripen and be pushed into the soil, a peculiar habit which gives the plant its name.

Latterly mixed seed of these two strains has become very popular. If a good early summer rainfall should occur then the Mid-Season variety will give a wonderful stand of herbage besides re-seeding itself. On the

other hand, if the rains should prove scanty then the Dwalganup Early Strain will at least set seed and produce a crop the following year.

We are expecting a consignment of best grade Australian-grown seed to arrive during March and, subject to arrival, are offering this seed at prices to be found on page 6. For best results sow with Italian or Wimmera Rye Grass at a rate of 5lbs. Sub-Clover and 10lbs. Rye Grass. If clover is sown alone use up to 10lbs. per acre.

TREE AND SHRUB SEEDS

EXOTIC SPECIES.

All varieties can also be had in 6d. packets.

	1oz.	½lb.	1lb.
<i>Aberia caffra</i> , Kei Apple	1/-	3/-	10/6

<i>Eucalyptus crebra</i> , Narrow-leaved Ironbark	1/6	5/-	17/6
<i>Eucalyptus diversicolor</i> , Karri, rapid grower	1/6	5/-	17/6
<i>Eucalyptus ficifolia</i> , Red-flowering Gum	2/-	6/6	24/-
<i>Eucalyptus gomphocephala</i> , Tuart, for coastal areas	1/6	5/-	17/6
<i>Eucalyptus Lehmanni</i> , Bushy Cornuta, for shelter rows	1/6	5/-	17/6
<i>Eucalyptus leucoxylon</i> , for hot coastal areas	1/6	5/-	17/6
<i>Eucalyptus longifolia</i> , Woolly Butt, straight grower	1/6	5/-	17/6
<i>Eucalyptus maculata</i> , Spotted Hickory	1/6	5/-	17/6
<i>Eucalyptus melliodora</i> , Yellow Box, thrives in O.F.S.	1/6	5/-	17/6
<i>Eucalyptus microcorys</i> , Tallowwood, splendid timber	1/6	5/-	17/6
<i>Eucalyptus resinifera</i> , Forest Mahogany, moist regions	1/6	5/-	17/6
<i>Eucalyptus robusta</i> , Swamp Mahogany, rapid grower	1/6	5/-	17/6
<i>Eucalyptus rostrata</i> , Red Gum, very reliable	1/6	5/-	17/6
<i>Eucalyptus saligna</i> , rapid grower, straight timber	1/6	5/-	17/6
<i>Eucalyptus sideroxylon</i> , Red Ironbark, recommended	1/6	5/-	17/6
<i>Eucalyptus tereticornis</i> , very similar to <i>E. rostrata</i>	1/6	5/-	17/6
<i>Eucalyptus torquata</i> , small, ornamental	½oz. 1/-	3/-	10/-
<i>Eucalyptus viminalis</i> , Willow Gum, rapid grower	1/6	5/-	17/6
<i>Ginkgo biloba</i> , ornamental, deciduous, nuts edible	6d.	1/-	3/6
<i>Grevillea robusta</i> , Silky Oak, handsome tree	2/-	6/9	25/-
<i>Jacaranda mimosaeifolia</i> , blue flowers, deciduous	2/-	6/9	25/-
<i>Juniperus virginiana</i> , Pencil Cedar, very hardy	1/-	2/6	8/6
<i>Leptospermum laevigatum</i> , Australian Myrtle	1/6	5/-	17/6
<i>Ligustrum lucidum</i> , Chinese Privet, hardy	1/-	2/6	8/6
<i>Pinus canariensis</i> , Canary Island Pine	1/6	5/-	17/6
<i>Pinus halepensis</i> , Jerusalem Pine	1/-	2/-	8/6
<i>Pinus insignis</i> (syn. <i>P. radiata</i>), fine timber tree	1/6	5/-	17/6
<i>Pinus longifolia</i> , Chir Pine, good timber	1/6	5/-	17/6
<i>Pinus patula</i> , ornamental, drooping foliage	1/6	5/-	17/6
<i>Pinus pinaster</i> , Cluster Pine, sow in situ	—	1/-	2/-
<i>Pittosporum eugenoides</i> , metallic green foliage	2/6	8/6	—
<i>Pittosporum undulatum</i> , ornamental, glossy leaves	1/6	5/-	17/6
<i>Prosopis juliflora</i> , Mesquite or Algaroba; fodder pods	1/-	2/6	8/6
<i>Robinia pseudacacia</i> , deciduous; good fencing posts	1/-	2/-	4/-
<i>Sterculia platanifolia</i> , Chinese Parasol, deciduous	1/3	3/6	12/6
<i>Telopea speciosissima</i> , Waratah; Australian protea; red flower....(12 Seeds for 4/-)			

TREE AND SHRUB SEEDS

NATIVE SPECIES.

Most varieties can be had in 6d. packets.

		$\frac{1}{16}$ oz.	$\frac{1}{8}$ oz.	1 oz.
<i>Adenandra fragrans</i> , red and white; shrub	Pkt. 1/-	4/-	15/-	—
<i>Adenandra uniflora</i> , dwarfier than above	Pkt. 1/-	2/-	—	—
<i>Aitonia capensis</i> , Klapperbos, beautiful shrub		1/-	2/6	8/6
<i>Aulax cneorifolia</i> , handsome yellow-green shrub		(12 Seeds for 2/6)		
<i>Aulax pinifolia</i> , red stems, dark green foliage		(12 Seeds for 3/9)		
		$\frac{1}{16}$ oz.	$\frac{1}{8}$ oz.	1 oz.
<i>Barosma scoparia</i> , heath-like shrub, pale mauve	Pkt. 1/-	3/6	—	—
<i>Barosma serratifolia</i> , long-leaved Buchu	Pkt. 1/-	3/6	—	—
<i>Bauhinia Galpinii</i> , terra-cotta flowers, deciduous	Pkt. 1/-	1/6	4/-	15/-
<i>Brunia macrocephala</i> , blue-green foliage and corymbs	Pkt. 1/-	2/-	—	—
<i>Brunia nodiflora</i> , evergreen shrub, white flower-balls		1/6	4/-	—
<i>Brunia Stokoei</i> , crimson flower-balls	Pkt. 1/-	2/6	—	—
<i>Caledendron capense</i> , Cape Chestnut, beautiful flowers		—	—	1/3
<i>Calpurnia sylvatica</i> , laburnum-like flowers and foliage		(12 Seeds for 1/-)		
		$\frac{1}{16}$ oz.	$\frac{1}{8}$ oz.	1 oz.
<i>Carissa grandiflora</i> , Amatungula, hedge plant		1/-	3/-	10/6
<i>Cassia didymobotrya</i> , handsome shrub, yellow spikes		1/-	3/-	10/6
<i>Duranta Plumieri</i> , Tree Forget-me-not		1/-	3/-	10/6
<i>Elaeodendron capense</i> , handsome evergreen tree		1/-	2/6	8/6
<i>Euryops athanasiae</i> , erect shrub, yellow flowers		1/6	4/-	15/-
<i>Euryops spathaceus</i> , evergreen, yellow flowers		1/-	2/6	8/6
<i>Ficus capensis</i> , quick growing, evergreen, 20ft.	Pkt. 1/-	2/-	6/-	—
<i>Grewia occidentalis</i> , evergreen shrub, mauve flowers		1/-	3/-	10/6
<i>Heterolepis decipiens</i> , dwarf, evergreen, yellow flowers		2/-	6/-	22/6
<i>Ilex capensis</i> , smooth leaves, red berries, prefers waterside		1/6	4/-	15/-
<i>Lebeckia cytisoides</i> , leguminous shrub, yellow flowers		—	1/-	3/-
<i>Lebeckia Simsiana</i> , glaucous leaves, yellow flowers....	Pkt. 1/-	2/6	8/-	30/-
<i>Leonotis leonurus</i> , velvety golden-bronze flowers	Pkt. 1/-	2/-	6/-	—
<i>Leucadendron argenteum</i> , Silver Tree of the Cape....	4oz. 6/9	—	—	2/-
<i>Leucadendron discolor</i> , florets red, bracts cream		(12 Seeds for 2/6)		
<i>Leucadendron Stokoei</i> , yellow foliage, erect		(12 Seeds for 1/6)		
<i>Leucadendron venosum</i> , tinted bracts around evergreen cones		(12 Seeds for 1/6)		
<i>Leucospermum conocarpum</i> , small tree, yellow heads		(12 Seeds for 1/6)		
<i>Leucospermum nutans</i> , shapely shrub, flowers profusely		(12 Seeds for 4/-)		
<i>Leucospermum reflexum</i> , tall species, excellent cut-flower		(12 Seeds for 2/6)		
		$\frac{1}{16}$ oz.	$\frac{1}{8}$ oz.	1 oz.
<i>Myrica cordifolia</i> , Wax Berry of the Cape sand dunes		1/-	3/-	10/6
<i>Noltea africana</i> , dense evergreen dark-leaved shrub		1/-	2/6	8/6
<i>Ochna atropurpurea</i> , evergreen shrub, yellow flowers		1/6	4/-	15/-
<i>Ochna natalita</i> , pyramidal tree, yellow flowers, crimson fruits		1/6	4/-	15/-
<i>Olea verrucosa</i> , "stock" for grafting commercial olives		1/-	2/6	8/6
<i>Podalyria calyptata</i> , long sprays mauvy-pink flowers		1/-	2/6	8/6
<i>Podalyria canescens</i> , silvery leaves, rose-pink flowers		1/-	3/-	10/6
<i>Polygala virgata</i> , wiry broom-like shrub, purple flowers. Pkt. 1/-		8/-	30/-	—
<i>Protea barbiger</i> , woolly pink or lemon heads		(12 Seeds for 4/-)		
<i>Protea cynaroides</i> , The Giant Protea, up to 11ins. diameter		(12 Seeds for 3/-)		
<i>Protea grandiceps</i> , pink and grey bearded		(12 Seeds for 2/6)		
<i>Protea grandiflora</i> , small tree, large white heads		(12 Seeds for 2/-)		
<i>Protea latifolia</i> , large heads, rose and cream		(12 Seeds for 2/-)		
<i>Protea lepidocarpodendron</i> , The Black Protea, black fur		(12 Seeds for 4/-)		
<i>Protea mellifera</i> , Cape Sugar Bush, rose and cream		(12 Seeds for 1/-)		
<i>Protea mellifera alba</i> , white-flowering variety		(12 Seeds for 1/-)		
<i>Protea rosacea</i> , Mountain Rose, hanging maroon heads		(12 Seeds for 2/-)		
		$\frac{1}{16}$ oz.	$\frac{1}{8}$ oz.	1 oz.
<i>Psoralea aphylla</i> , waterside shrub, blue and white		1/3	4/-	15/-
<i>Psoralea pinnata</i> , blue flowers, feathery foliage*		1/3	4/-	15/-
<i>Pycnostachys urticaefolia</i> , salvia-like plant, blue	Pkt. 1/-	2/6	8/6	—
<i>Rhoicissus capensis</i> , Wild Grape, very decorative	Pkt. 1/-	2/6	8/6	30/-
<i>Royena lucida</i> , glossy foliage, excellent hedge plant		1/6	2/6	8/6
<i>Sutherlandia frutescens</i> , crimson-flowered shrub		1/6	4/-	15/-
<i>Tephrosia grandiflora</i> , dwarf shrub, purple flowers		1/6	2/6	8/6
<i>Virgilia capensis</i> , Keurboom, mauve-pink, scented		1/-	2/3	7/6

FERTILISERS

(Free delivery within our usual delivery area in the Cape Peninsula.)

Sulphate of Iron				1/3	4/-	7/6	12/6	—	—
"Eradiweed" Weed Killer. Pint 3/-; quart 4/6; ½ gallon 7/6; gallon 13/6.	(e)								
"Velvas" Lawn Sand, 3½lbs. 3/-; 7lbs. 5/6; 14lbs. 10/-; 28lbs. 18/6; 56lbs. 25/-; 112lbs. 42/6									

SPRAY MATERIALS

For Chewing Insects—Caterpillars, etc.

Arsenate of Lead. Per lb. 1/6; 4 lbs. 3/6; 48 lbs. 40/-.
 Calcium Arsenate. 1 lb. 1/6; 4 lbs. 4/6; 100 lbs. 65/-.
 Meta Tablets. For slugs and snails. Pkt. of 50 tablets 2/6.
 Paris Green. For cutworm, etc. Per lb. 2/6; 5 lbs. 12/-.

Mainly for Scale Eradication.

Harbas. Per pint 3/-; gallon 9/6; 5 gallons 36/6.
 Scalecide. Per quart 4/6; gallon 9/6 (American).
 Spracream. Per pint 2/6; quart 4/-; gallon 10/-.
 Volck. Per pint 3/-; quart 5/-; gallon 12/6.

For Sucking Insects—Aphides, etc.

Auto-Shreds. For fumigating glass houses. Pkt. 1/6 (for 1,000 cubic feet).
 Black Leaf 40. Per oz. 2/-; 5 ozs. 5/6; 1 lb. 13/6; 2 lbs. 22/-; 10 lbs. 65/-.
 D.X. Per ½ oz. 2/6; ½ pint 5/6; pint 9/6; quart 17/6; gallon 45/- (American).
 Gishurst's Compound. Per 14 oz. cake 2/3.
 Katakilla. Per 10 gallon pkt. 2/3; 50 gallon pkt. 7/-.
 McDougall's Fruit Tree Wash. Per pint 2/9; gallon 12/-; 5 gallon 50/-.
 Nicotine Sulphate, 7%. Per pint 6/-; gallon 32/6.
 Nicotrol. Per pint 6/6; quart 11/-; ½ gallon 20/-; gallon 35/-.
 Pyroicide Dust, 10%. Per lb. 2/3; 5 lbs. 9/6; 10 lbs. 17/6; 25 lbs. 27/6.
 Tobacco Dust, 4%. Per lb. 2/6; 9 lb. drum 13/6; 45 lbs. 50/-.

Principally for Fungus Troubles.

Bordeaux Mixture. Per lb. 1/6; 4 lbs. 4/-; 8 lbs. 7/-; case of 48 lbs. 40/-.
 Carbonate of Copper. Per lb. 2/-; 25 lbs. 37/6; 100 lbs. 145/-.

Principally for Fungus Troubles.

Ceresan. Per 2 lb. pkt. 7/6; 10 lb. tin 34/6; 28 lb. drum 88/6.
 Copper Carbonate. 1 lb. 2/-; 25 lbs. 37/6; 100 lbs. 145/-.
 Copper-Lime Dust. Per lb. 1/-; 8 lbs. 5/-; 30 lbs. 17/6.
 Copper Sulphate. Per lb. 1/-; 5 lbs. 3/-; 25 lbs. 10/6; 100 lbs. 35/-.
 Kudu-Formal. Per lb. bottle 1/9; ½ gallon tin 5/6; 1 gallon tin 8/6; 1 gallon jar 13/6.
 Sulfocide. Per pint 3/3; quart 5/6; gallon 13/6 (American).
 Sulphur. Per lb. 6d.; 10 lbs. 3/6; 50 lbs. 13/6; 100 lbs. 24/6.
 Sulphur-Lime Solution. Per pint 1/6; gallon 6/-; 5 gallons 17/6.

Soil Insecticides.

Clift's Fluid. Per pint 3/-; quart 4/6; ½ gallon 6/9; 1 gallon 10/-; 5 gallons 45/-.
 Garden Naphthaline. Per lb. 6d.; 25 lbs. 7/6; 100 lbs. 22/6.
 Pestdorm Manurial Insecticide. Per carton 1/6; 5 lbs. 3/-; 10 lbs. 5/-; 25 lbs. 10/-; 100 lbs. 32/6.

Other Similar Products.

Capex Ant Poison. Per pint tin 2/6.
 "Kudu" Wood Preservative. For Poultry Houses, etc. Per gallon 4/6.
 Mole and Vermin Fumigators. Each 3d.; doz. 2/6; 100 15/-.
 Ostico. For tree banding. Per ½ lb. 2/9; 10 lbs. 32/6.

American Packing.

Note: Those items marked "American" are in American Packages the contents of which are one-sixth less than Imperial measure.

COMPOSTS—(continued)

compost of good texture was obtained. The result was really a composted soil as a high proportion of soil was generally used.

The refinements adopted in the more elaborate and scientifically planned methods introduced during the past two decades have enabled agriculturists to break down in the compost heaps large amounts of cheap, readily available organic wastes, such as are found on most farms, in a remarkably short period and by means of relatively small amounts of animal excreta. This form of compost might readily be termed a "humus compost" on account of the high proportion of organic matter used. The dimensions of the heaps, the amount of moisture needed, the speeding up of the fermentation by a sort of inoculation process, the fostering of the initial development of the bacteria by applications of readily soluble forms of nitrogen, the addition of phosphates—all these points are gone into in great detail in the various published works on the subject.

The pioneers of the process were Sir Albert Howard and his co-workers in India; their system is known as the Indore Process and was evolved to meet the particular needs of a community peculiar to a large part of India where the only fuel available for domestic use is the dried dung of buffalo and cattle. As a consequence the supply of animal manures available for application to the land is limited; the Indore Process enables large quantities of coarse organic wastes such as sugar-cane thrash and other crop refuse to be rotted down for agricultural purposes in a short time.

In the Western Province this process is being tried out with varying degrees of success. At "Belle Constantia" we found that the open-heap method, while saving capital expenditure, took longer to produce the finished compost. This was mainly due to the drying out of the outer sides and tops of the heaps by strong south-east winds in the summer months. Three years ago two long shallow brick pits were built and, on these proving successful, two more were added eighteen months later. The inside dimensions of each pit are 65ft. x 12ft. 6ins. x 2ft. 6ins. The maximum output capacity of the battery of four pits is from 500 to 600 tons per annum according to the materials used. From the time of charging a pit at one end with the various raw materials to loading out compost on to lorries at the other end occupies, on an average, 10 to 12 weeks in

summer. A "charge" starts off with a cubic capacity of 12ft. 6ins. x 12ft. 6ins. x 2ft. 6ins., but with each successive turning there is a shrinkage. About five turnings are made in the process. As each "charge" moves forward one stage another takes its place. The chief raw materials used by us are wheaten chaff, organic wastes from our seed cleaning mills and florist shops, stable manure, Karroo (sheep) manure, poultry manure, soil, agricultural lime, phosphates. Water is sprayed by hose-pipe when necessary.

A decided advantage of the brick pits is the speeding up of the turning process with a consequent saving of labour costs. Haphazard execution of the best plans cannot produce a uniform article. Under the open heap method, unless strict control is exercised, there is a tendency for labourers to load away from the easiest loading point or from a point where they themselves judge the process most complete, and, once the routine of turning the material has been upset, chaos soon results.

The pits at "Belle Constantia" are on a favourable site because the ground falls away rapidly at the loading end. The gates when flung downwards rest on a concrete ledge (which incidentally carries a gutter to conduct any seepage liquor to a sump) and in this position, on a level with the lorry sides, greatly facilitate loading.

The walls of these pits are 9ins. throughout, but the inner walls could well be made 4½ins. The total cost of construction using farm labour was approximately £120. On a level site the cost might well be £40 less but the advantage in loading mentioned above would be sacrificed.

No trouble whatsoever has ever been experienced with flies during the period of more than three years these pits have been in operation.

QUALCAST "PANTHER" MOWER

12in. cut, ball-bearing roller, complete with grass-box. £5 5s. D.

AMERICAN TREE CARNATIONS

Plants of these great favourites are well rooted and established and sent out ex pots. We expect to have the following varieties available in autumn and spring.

Prices: As set out against each variety in list below. All varieties are 3d. less when included in a dozen. Assorted dozens, our selection, are offered for 18/- per dozen plus packing and postage.

Postage and Packing: 2/- doz., 1/6 ½ doz., 1/- ¾ doz. or less within the Union.

N.B.—Plants usually ready 15th March to 15th October.

Allwood's Cream (Allwood Bros., 1938). Creamy yellow, spicy fragrance, heavy growth with massive flowers. Very free, ideal exhibition variety	5/-
Allwood's Purity (Allwood Bros., 1934). A white variety of great merit; has been awarded the Daily Mail Cup for the best scented Carnation of recent origin and British raised on two occasions	2/6
Aurora (C. Engelmann, 1933). Flowers large, colour cream ground suffused with light pink and apricot. Plants dwarf and of vigorous growth	2/-
Barbaba Farr (A. C. Farr, 1937). A very free-flowering variety. Flowers scarlet of medium size	2/-
Bonanza (Wm. Sim, 1934). Yellow ground fancy of large size. Plants free-flowering and of stiff upright growth	1/6
Cattleya Mauve (Allwood Bros., 1928). A unique shade of mauve, large flowers of good form; scented	2/-
Chief Kokomo (Russel Engle, 1934). Flowers very large, yellow with pink stripes; plant of upright, strong growth and free-flowering. American plant patent No. 35	1/6
Dainty Queen (Wm. Sim, 1937). Flowers are large, pure white with deep pink stripes; a vigorous grower and very free-flowering	2/6
Doris Allwood (Allwood Bros., 1936). Soft salmon rose, heavily shaded French-grey, large flowers. Winner of Daily Mail Cup for perfume	2/6
Fairy Queen (C. B. Johnson, 1928). Very large, light salmon pink; free-flowering and strong growing	1/6
Fancy Spectrum (Allwood Bros., 1931). Salmon flaked red, a sport of spectrum	1/6
Freda (C. Engelmann Ltd., 1937). Seedling of Laddie, of more vigorous growth. Flowers very large, of light pink, not unlike Laddie. Produces considerably more flowers than its parent	2/6
Gem (C. Engelmann, 1932). Sport of Laddie, resembling it in all but colour, which is salmon pink heavily striped with red. Colour absolutely fixed and exceptionally bright	3/-
Giant Laddie (A. A. Pembroke, 1932). A true sport of Laddie; flowers of larger size and deeper colour and the plant of more vigorous habit than its parent	3/-
Golden Wonder (Littlefield-Wyman, 1935). Large flowers, yellow striped pink; plants rather short, of stiff upright growth	3/-
Irene (C. Engelmann, 1935). Flowers well shaped, scarlet; an exceptionally free-flowering variety	2/-
Improved Regina (), Light salmon pink, very free	1/6
Joyce (Farnham Royal Nurseries Ltd., 1936). Flowers large, bright crimson, excellent in every way	2/-
King Cardinal (Stuart Low, 1939). Brilliant and intense scarlet, very free	3/-
Lady Simmons (Stuart Low, 1932). White ground heavily marked with purple, free-flowering	2/6
Maine Sunshine (Strout's Inc., 1920). Flowers large and of good form, pale yellow, the best yellow for mid-winter	2/-
Marchioness of Headfort (Allwood Bros., 1936). Creamy white and red of the Pelargonium type	3/-
Orchid Beauty (Littlefield-Wyman, 1937). Flowers large, of a unique shade of purple, shading to light mauve at the edge of each petal; a very striking combination of colours. Strong-growing variety	3/4
Orange Wonder (Littlefield-Wyman, 1937). A rich shade of orange with pink markings	2/-
Patricia (Baur-Steinkamp Co., 1932). Very large white, strongly scented. A valuable addition to the white varieties	2/-
Pelargonium (Allwood Bros., 1935). Medium-sized flowers, maroon with white edge, a remarkably striking combination of colours	2/6
Pink Spectrum (Farnham Royal Nurseries, 1934). The best of the various Spectrum sports, light pink, quite distinct from Salmon Spectrum, to which it is in every way superior	1/6
Red Laddie (C. Engelmann, 1926). A red sport of Laddie, like its parent in every respect but colour	3/-
Regal (Allwood Bros., 1932). Heliotrope flaked cerise; flowers large and well-shaped	2/-
Robert Allwood (Allwood Bros., 1933). Very large flowers, bright scarlet; a variety of undoubted merit	2/-
Rose Charm (Baur-Steinkamp & Co., 1935). Large rose-pink flowers; plants of vigorous growth and free-flowering. One of the best novelties sent out from America during the last few years	2/-
Sagamore (Wm. Sim, 1937). Flowers large, deep orange with pink stripes and flakes. Calyx and stem good, free-flowering	2/6
Salmon Laddie (C. Engelmann, 1936). Sport of Laddie, like its parent unsurpassed in quality. Indispensable when flowers of the very highest quality are required. Like Laddie except in colour, which is salmon-rose; quite distinct from any of the Laddie sports	3/-
Sir P. Sassoon (Allwood Bros., 1925). Crimson with old clove scent, large fringed flower	2/-
Scarlet Pelargonium (Allwood Bros., 1935). Flowers bright red edged with lighter colour, very striking	3/6
Spectrum Supreme (Patten & Co., 1931). Improved Spectrum, a sport of this well-known variety; deeper in colour	1/6
Sylvia (C. Engelmann, 1934). Large flowers of a clear soft pink. Stems slender but strong. A good Commercial variety	2/6
Topsy (Richmond Greenhouse Co., 1921). Flowers large of deep crimson colour; calyx perfect. Plants dwarf and free-flowering	2/-
Vivian (Witterstaetter, 1933). Medium-sized flowers of deep pink colour; very free-flowering	1/6
White Pearl (Stuart Low Co., 1921). Largest pure white Carnation in commerce; strongly scented	2/6
W. H. Wallace (W. E. Wallace, 1936). Flowers are of medium size in a beautiful shade of salmon-rose. One of the best market varieties in cultivation; of excellent keeping quality. Plants vigorous; rather dwarf, very free-flowering	2/-
Wivelsfield Claret Improved (Allwood Bros., 1933). Delightful claret shade, large and good shape, free flowering	2/-

HOW and WHEN to ORDER BULBS

If cash is sent with the order we will send bulbs carriage free, otherwise you may deduct 5% and have the carriage added.

All bulbs are sold subject to the Conditions of Sale and Non-Warranty as set out in our invoices, letterheads, etc.

For your convenience in ordering we are printing here a list of the various kinds of bulbs (but not the varieties) stating next to each the best time to order these—obviously when the bulbs, corms, rhizomes or root-stocks are dormant or semi-dormant.

Orders can be sent at other times but are liable to be held over until stocks are in a proper condition for sending out.

Achimenes Hybrids	May-Aug.
Agapanthus (African Lily)	May-Aug.
Alliums	Jan.-Mar.
Alpinia nutans	May-Aug.
Alstroemeria (Peruvian Lily)	May-Aug.
Amaryllis belladonna (March Lily)	Oct.-Dec.
Anemones	Jan.-Mar.
Antholyza	Jan.-Mar.
Aponogeton distachyum (Waterblommetje)	Jan.-Mar.
Arum Lilies (Common Arum)	Mar.-Aug.
Babiana (Bobbejaantjes)	Jan.-Mar.
Begonia (tuberous)	May-Aug.
Cape Bulbs for Overseas (most kinds)	Feb.-Mar.
Clivia	April-July.
Crinum (Orange River Lily)	Jan.-Mar.
Cyclamen	Apl.-May
Cyrtanthus	Jan.-Mar.
Daffodils	Jan.-Mar.
Dracunculus	Jan.-Mar.
Eucharis amazonica (Eucharist Lily)	May-July.
Freesia	Jan.-Mar.
Gladiolus (imported) Large Flowered	Dec.-Mar.

ACCLIMATISATION

While Gladioli and many other bulbs will bloom satisfactorily the first season after importation, there are several kinds, particularly Daffodils, Hyacinths and Tulips, which require a season or two to become acclimatised. Good stocks of these acclimatised bulbs are by no means plentiful, but STARKE-AYRES have succeeded in building up their strains by growing each particular class of bulb in the environment which suits it best. Thus our Daffodils, Hyacinths, Tulips, etc., are grown on sandy ground, while Gladioli, Irises and others are grown at our well-known "Belle Constantia" floral farm, where the soil is of a heavier texture.

Gladiolus (imported) Primulinus	Feb.-April
Gladiolus (acclimatised)	July-Sept.
Gladiolus (native species)	Jan.-Mar.
Gladiolus psittacinus	July-Sept.
Gloriosa superba (Glorious Lily)	May-Aug.
Gloxinia	Mar.-July
Haemanthus coccineus (Maartblom)	Sept.-Nov.
Hedychium coronarium flavum	May-July.
Hemerocallis (Day Lily)	May-July.
Hippeastrum Hybrids	Jan.-Mar.
Hyacinths	Jan.-Mar.
Irises (bearded)	May-Aug.
Irises (bulbous)	Jan.-Mar.
Irises (Japanese)	May-Aug.
Ixias	Jan.-Mar.
Lachenalia	Jan.-Mar.
Liliums (imported)	Dec.-Feb.
Liliums (acclimatised)	Mar.-May.
Montbretias	May-July
Muscari (Grape Hyacinths)	Jan.-Mar.
Narcissi	Jan.-Mar.
Nerine	Sept.-Nov.
Nymphaea (Water Lilies)	July-Sept.
Ornithogalum (Chincherinchee)	Jan.-Mar.
Pancratium (Spider Lily)	Jan.-Mar.
Polianthes tuberosa (tube-rose)	May-Aug.
Ranunculus	Jan.-July.
Scillas	Jan.-Mar.
Sparaxis	Jan.-Mar.
Sprekelia formosissima	Sept.-Nov.
Streptanthera cuprea	Jan.-Mar.
Tritonia	Jan.-Mar.
Tulips	Jan.-Mar.
Vallota	Sept.-Nov.
Watsonias (hybrids)	Jan.-Mar.
Watsonias (native)	Jan.-Mar.
Watsonias (Summer Flg.)	Mar.-May
Zantedeschia	Jan.-June.

BULB FIBRE

Specially prepared for growing Bulbs indoors. Daffodils and Hyacinths can be easily grown in shallow bowls containing this Fibre, which must be kept just moist but not too wet during the growing period. They may be started as early as February and you will be surprised how soon they will flower. Bring them close to the light when leaf growth has well started. Price: Per lb. 9d., 6 lbs. 4/-, per sack 17/6. F.

BULB BOWLS

We can supply terra cotta bowls as follows:

7 in. dia., 1/3 ea., 13/6 doz.
12 in. dia. 4/- ea., 42/- doz. F.

Also a range of fancy bulb bowls in varying sizes and colours. Prices for these range as follows:

1/6, 2/-, 2/6, 3/3, 4/9 ea. F.

William Pitt, red tinged carmine-purple	—	—	—
Yellow Queen (Moonbeam), deep primrose yellow, large open cup-shaped flower on a strong stem. So far this has proved the most reliable variety for South African conditions	1/-	9/-	60/-

COLLECTIONS OF CAPE BULBS

For a great number of the beautiful flowers in horticulture the world is indebted to South Africa, and this applies particularly to the bulbs. The beauties of many of the following native species are, however, known only to us South Africans who can cultivate them in their natural habitat.

We urge garden lovers to grow the rarer species that are offered herein, become familiar with them and teach their fellow-countrymen to appreciate and preserve them.

COLLECTION A. Price 10/6.

Posted to any address in the Union or Southern African Territories.

This will include at least 10 varieties (our selection) and we are able to give better value than when ordered separately.

COLLECTION B. Price £1 1s.

Posted to any address in the Union or Southern African Territories.

This will include at least 20 varieties (our selection) and we are able to give better value than when ordered separately.

Special Collections can be made up to any value.

MISCELLANEOUS BULBS & ROOTS

for Winter Planting

	ea.	doz.	100

VOLLEDIGE BESKREWE LYS VAN ROOSSOORTE

Ons publiseer 'n aparte **LYS VAN ROSE**, en 'n eksemplaar sal graag aan u gestuur word op aanvraag. Meer dan 300 variëteite word genoem.

Ons roosbome word uitgehaal vir versending gedurende Junie en Julie. Baie variëteite is alreeds verkoop hierdie seisoen. Wanneer rose bestel word, kan u met veiligheid die keuse van variëteite aan ons oorlaat, en net meld watter soort roos u verlang en watter kleure u verkies.

TESTIMONIAL

It may interest you to know that I have still about half-a-dozen Rose Trees that I purchased from the late Mr. Charles Ayres in 1892 (47 years ago) and they are all strong and healthy. Three of them are 9ft. high and the stems about 24in. in circumference at base. At present they are throwing out strong, healthy shoots and are full of flowers. About the middle of October last one tree had over 150 blooms on it and the bulk of them quite up to exhibition form.—George, 13/12/39.

STANDARDS

The following varieties have been budded for 3-foot Standards.

Prices are for local delivery or f.o.r. Rosebank. These plants cannot be sent by post owing to the length being greater than the regulations allow.

Strong 2-year plants. Well-formed heads on 3ft. stems. 7/6 each.

HALF STANDARDS

Budded on 2ft. to 2½ft. Stems. 5/- each.

All varieties as listed under "Standards."

Also Mrs. Bryce Allan.

CLIMBERS

PLEASE NOTE!

When ordering Climbers it is advisable to use the prefix "Cl." before the name: for example "Cl. Mrs. G. A. van Rossem." Many varieties are obtainable both in the Dwarf and Climbing forms, and by using the prefix there is less chance of misunderstanding and mistakes arising.

GOOD VARIETIES

FOR THE AMATEUR

If you are not a Rose grower, and are in doubt which varieties to select from the General List, leave the selection to us and you will not be disappointed; or select from the following specially recommended reliable varieties.

Here is a good list for the beginner; all are good growers, free flowering, and covering most of the available shades of colour, all distinct. From these you can make your own choice with every assurance of success. We have fair stocks of these but, in case we are sold out of any particular variety on receipt of your order, we will send you the very best substitute.

RECOMMENDED LIST

INCLUDES ALL SHADES

2/- Varieties

Autumn. Apricot-gold.
Barcelona. Deep crimson.
Caledonia. Pure white.
Catherine Kordes. Scarlet shaded crimson.
Clovelly. Pink.
Elizabeth of York. Cerise-pink.
Korovo. Peach blossom.
Ophelia. Salmon-flesh.
Prince Felix de Luxembourg. Deep carmine-red.
Una Wallace. Bright old rose.
Ville du Paris. Sunflower-yellow.
Westfield Star. Yellow.

2/6 Varieties

Crimson Glory. Velvety crimson.
Etoile de Holland. Dark red.
Golden Dawn. Yellow, flushed rose.
J. Otto Thilow. Rose-pink.
Julien Potin. Golden-yellow.
Luis Brinas. Orange-copper bud.
Malar Ros. Deep crimson.
Talisman. Scarlet-gold.

3/6 Varieties

Comtesse Vandal. Reddish-copper-bronze bud.
Elite. Orange-rose.
Feu Pernet Ducher. Primrose-yellow.
Lady Rachel Verney. Rose.
Leontine Contenot. Sunflower-yellow.
Matador. Scarlet-crimson.
President Herbert Hoover. Cerise-orange-gold.
Valsheda. Rose-pink.

5/- Varieties

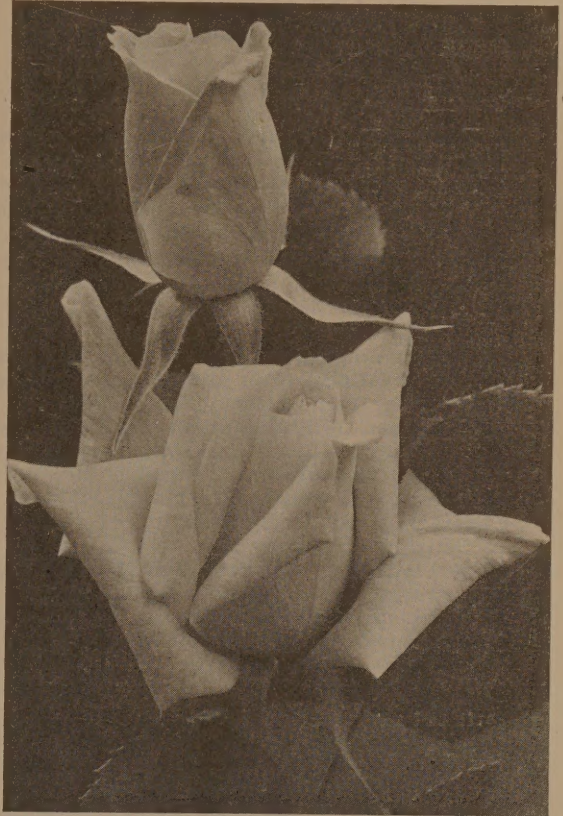

Dickson's Bouquet. Salmon, carmine and apricot.
Emile Cramon. Bud copper-red.

5/- Varieties

Friendship. Strawberry red.
Gloaming. Deep rose, orange ground.
King Alexander I. Reddish-copper bud.
McGredy's Peach. Creamy yellow.
McGredy's Pink. Bright rose.
Percy Izzard. Deep cream.
Souvenir de Denier van der Gon. Golden-yellow.
Vainqueur. Dark blood-red.

7/6 Varieties

Eclipse. Yellow.
Golden Queen. Bud deep yellow.
Home, Sweet Home. Velvety pink.
Lemania. Red.
Madame Henri Guillot. Dark salmon-pink.
Rex Anderson. Pale lemon-yellow.

An excellent example of the prevailing fashion in roses—long, pointed buds and open blooms of good substance and quality.

PERM-O-TAGS (METALLIC).

Writing with an ordinary, sharply pointed H, or HH, pencil gives the best results. Use fairly heavy pressure, having label on a soft background (blotting paper or cardboard, etc.), so the writing will indent into the metal. Then turn the label over and smooth out, using the side of the pencil after the fashion of a bricklayer's trowel. Prize: doz. 1/-; 100 6/-. E.

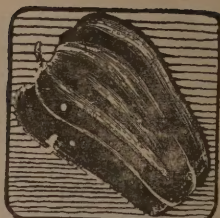

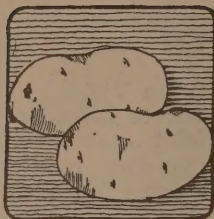

BEDDING and BORDER PLANTS

Some of these are now ready but others will only be available at the seasons indicated. All orders are dealt with in rotation and will be despatched when the plants are ready. If you are unable to wait, please mark your order accordingly and we will send only what is ready, cancelling the remaining portion of the order.

Giants of California. Colours separately or mixed					1/-	5/-	1/6	7/6

VEGETABLE TRANSPLANTS

Country orders are packed with the greatest care and almost always reach their destination in good condition. We cannot, however, be responsible for loss due to delays, bad handling or bad weather en route.

These are available in season, but we cannot be sure of having all varieties ready for dispatch at any particular date. Unless customers specially instruct us not to, we will substitute some other variety which we think will be suitable when the one ordered is not ready.
